

Education Call Accounting Software

Educational Facilities use CASH+ Call Accounting Software to:

- Detect Misuse and Abuse
- Provide Emergency and/or Custom Alert Notification
- Allocate Costs for Budgeting Purposes
- Recover Telephone Costs

Features & Benefits:

Universities, Schools and other learning facilities with structured environments need strict cost recovery and allocation measures to adhere to their projected annual budget. With CASH+ Call Accounting Software all telephone activity is logged, long distance costs are applied to these calls and allocated to specific departments. CASH+ efficiently allocates all telephone time and charges.

The need to identify threatening or harassing callers has become an issue for many facilities. Use CASH+ Call Accounting to produce reports that display incoming caller identification allowing you to isolate situations rapidly. Most business phone systems support this feature.

The Call Notification features are designed to notify staff of emergency, security or other administrative issues. It is an invaluable feature when an immediate response to emergencies is crucial.

Organizations such as Converse County School District use our software and find that it has provided them with a valuable solution for their call accounting needs.
