

Media Outlet Call Accounting Software

Media Outlets Use CASH+ Call Accounting Software to:

- Allocate Equipment Charges to Various Departments and Divisions
- Detecting Misuse and Abuse
- Allocate Telecommunication Costs for Budgeting Purposes
- Provide Emergency and/or Custom Alert Notification

Features & Benefits:

Radio & TV Stations and Movie Studios with temporary tenants during filming or recording need to enforce strict cost management and allocation measures to ensure accurate billing. The need to recover all telephone and equipment costs is a must. With CASH+ Call Accounting Software all telephone activity is logged and long distance costs are efficiently allocated to specific departments or locations.

Using CASH+ Call Tracking Software allows you to easily recover the cost of telephone service as well as generate serious profits from surcharges. Surcharges are automatically added to any call type based on a flat rate, percentage or both!

The need to identify threatening or harassing callers has become an issue for many institutions. Use CASH+ Call Management Systems to produce reports that display incoming caller identification allowing you to isolate situations rapidly. Most business phone systems support this feature.

Organizations such as Bridge Studios use our software and find that it has provided them with a valuable solution for their call accounting needs.

For more information on the CASH+ Call Tracking Software from Hansen Software Corporation, please call us toll free at 1-877-795-2274.
