

## **Online Webinar...**

Hansen Software Corp. offers online Webinars for a live look at the CASH+ Software. Your Hansen Software representative will e-mail an invitation for up to five attendees to participate together. What a powerful tool! Just call us to arrange your individual online product presentation. Who knows the product better than us!

## **Online Installation Assistance...**

In order to ensure ease of installation, we provide you with the ability to connect to one of our technicians online to assist with the installation of your CASH+ software. This makes set up and learning fast and effective. Ease of installation could not be simpler.

## **Built in Online Support Tool...**

We also use the same method to provide technical support, training or any other assistance that may be required. The CASH+ computer must have internet access to do this. Contact Hansen Software to be sure one of our technicians is available to connect and then you will be directed to the online support tool which is built into your CASH+ software or you may go to our website at [www.hansensoftware.com](http://www.hansensoftware.com). Either way, in seconds our technicians will be connected to your computer! Technical support has never been so friendly.
