# Education Call Accounting Software

Educational Facilities use CASH+ Hansen Call Reports to:

- Detect Misuse and Abuse
- Provide Emergency and/or Custom Alert Notification
- Allocate Costs for Budgeting Purposes
- Recover Telephone Costs

Features & Benefits:

Universities, schools, and other learning facilities with structured environments need strict cost recovery and allocation measures to adhere to their projected annual budget. With CASH+ Hansen Call Reports all telephone activity is logged, long distance costs are applied to these calls and allocated to specific departments. CASH+ Hansen Call Reports efficiently allocates all telephone time and charges.

The need to identify threatening or harassing callers has become an issue for many facilities. Use CASH+ Hansen Call Reports to produce reports that display incoming caller identification allowing you to isolate situations rapidly. Most business phone systems support this feature.

The Call Notification features are designed to notify staff of emergency, security or other administrative issues. It is an invaluable feature when an immediate response to emergencies is crucial.

Organizations such as **California Coast University** use our software and find that it has provided them with a valuable solution for their call accounting needs.
